

Nad's Eyebrow WAX STRIPS

BEFORE YOU BEGIN

FOR BEST RESULTS: READ ALL DIRECTIONS, WARNINGS AND PRECAUTIONS CAREFULLY BEFORE USE. FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN SKIN IRRITATION OR OTHER INJURY.

- Before each use, test the wax and oil wipe on a small area of skin you wish to treat. If there is no adverse reaction, proceed with full application.
- Hair should be at least 2mm (1/16") long.
- Keep Nad's Eyebrow Wax Strips away from heat.
- Skin must be clean and dry prior to waxing.

(Figure1)

PREPARE

Using your finger, generously apply the Nad's Skin Shield Powder on the treatment area before waxing. Do not warm or rub wax strips. With a pair of scissors, cut the strip along the template dotted lines marked with ✂ (grey shaded area) or in your own desired shape (Figure1). In one quick movement, separate strip by removing protectant film (Figure2).

(Figure2)

APPLY & REMOVE

We suggest waxing your eyebrows in sections. This makes for easier application, more precise hair removal and ultimately better results. Start by waxing underneath the tail 1 using one of the "eyebrow" labelled wax strips. The narrower strips in-between each labelled strip can be used for the finer areas of the eyebrow such as under the bridge 2. The top of the brow is optional 3 & 4 (Figure3). Immediately place strip over the area to be treated. Using your index finger, firmly smooth over the strip 3-4 times in the direction of hair growth (Figure4). Holding skin taut with one hand, quickly pull strip off in the opposite direction of hair growth (Figure5). The quicker you pull the strip the more effective the hair removal. Remember to hold skin taut with the other hand and to pull the strip close and parallel to the skin rather than away from the skin (Figure6). **IMPORTANT: DO NOT TREAT THE SAME AREA TWICE.** Repeat the process for the other eyebrow. Finish by waxing between the brows, using the strip labelled 'middle brow'.

(Figure3)

(Figure4) - Apply

(Figure5) - Remove

CLEAN & SOOTHE

Soothe the area and remove any excess wax with the Post Wax Calming Oil Wipes provided. Use baby oil to remove wax residue if you run out of wipes.

TIPS & HANDY HINTS

- **DO NOT** use directly after showering or bathing. Wait at least 30 minutes, when skin is dry and moisture-free.
- Only apply the wax strip over the hair you wish to remove. If you accidentally apply the strip over the wrong area, slowly peel the strip in the same direction of hair growth and wipe wax with the Post Wax Calming Oil Wipe.
- **DO NOT** reapply wax on an area that's already been treated.
- After applying the wax strip, quickly remove strip in the opposite direction of hair growth while staying close & parallel to the skin. **DO NOT** pull the strip off away from the skin as this may cause irritation.
- It is normal for skin to turn slightly pink for some time after treatment. Apply a cold compress to soothe the area if required.

(Figure6) Don't pull upwards. Remove strip close to skin.

WARNINGS & PRECAUTIONS

WAX STRIPS ARE NOT SUITABLE FOR MALE BEARD AREA, BREAST, NIPPLE, EYELASH, PERIANAL OR GENITAL AREAS • KEEP OUT OF REACH OF CHILDREN • MAY NOT BE SUITABLE FOR THE ELDERLY OR DIABETICS • DO NOT USE IF YOU ARE ON ANY MEDICATION WHICH MAY AFFECT THE SKIN OR IF UNDERGOING ANY OF THE FOLLOWING DERMATOLOGICAL TREATMENTS: TOPICAL RETIN A, SKIN PEEL, DERMABRASION OR LASER RESURFACING • DO NOT USE ON SUNBURNED, DRY, FLAKY, BROKEN OR IRRITATED SKIN; OR OVER WARTS, PIMPLES, MOLES, VARICOSE VEINS OR WOUNDS; OR IF YOU HAVE PREVIOUSLY EXPERIENCED ADVERSE REACTIONS TO WAXES • ALLOW 24 HOURS BEFORE USING ASTRINGENT LOTION ON THE TREATED AREA • DO NOT EXPOSE NEWLY TREATED SKIN TO DIRECT SUNLIGHT FOR AT LEAST 24 HOURS. PROTECT YOUR SKIN WITH A SUNSCREEN • IF DISCOMFORT OR A BURNING SENSATION IS EXPERIENCED, APPLY A COLD COMPRESS TO THE AREA, IF SENSATION PERSISTS, SEEK MEDICAL ADVICE • STORE AT ROOM TEMPERATURE IN A COOL, DARK PLACE
